Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: IV. 3.

The inventions set forth in claims 1, 3-5 and 7-12 relate to moulded resins for electrical components which contain as an essential constituent a crosslinking agent with at least three functional groups.

The inventions set forth in claims 13-15, 17, 18 and 20-26, on the other hand, relate to methods for manufacturing moulded resins for electrical components which include cases in which an aforementioned cross-linking agent with at least three functional groups is not essential.

Therefore, the two groups of inventions cannot be considered to be mutually linked. The inventions in the present application thus do not satisfy the condition of unity of invention.
